Sogol Ash, MS

Holistic Wellness Coach and Preventive Health Specialist

“Nutrition for an Optimized Life”

Learn about the mind-gut connection and foods that optimize energy levels

◦ **Key Takeaways:**

- **1. Our nervous system & digestion are intimately connected.** The more we strengthen parasympathetic tone through mindfulness & positive thoughts/experiences, the better our digestion and overall wellness.
- **2. To support our mitochondria we must eat for energy.** By eating less processed & inflammatory foods, and more quality protein, fueling fats, non-starchy vegetables, low-glycemic fruits, and anti-inflammatory herbs we can transform our physical & mental well being.
- **3. Have compassion. Striving for perfection is unrealistic.** A few small changes go a long way, so always just do the best you can!
